

10 Reasons WHY to
Install ACE

African Casino Equipment Suppliers

Innovative Trusted Secure Professional Solutions

Leaders in Cashless Gaming

10 Reasons Why You Need to Install ACE:

- 1** Computerising your gaming floor has many benefits the most basic being that tedious manual tasks are automated. Taking the manual processes out of the equation also implies reduction in human error.
- 2** A computerised management system eliminates the time spent on recording meters, punching these into an Excel spread sheet then doing tedious comparisons and analysis.
- 3** A computerised management system provides real-time data analysis of your gaming floor, table estimations are as accurate as the last entered Chip Count with slots data provided in real-time.
- 4** Incentivised gaming can be implemented where acquisition is based on turnover automatically occurring with each spin or tracked member session at a gaming table. Loyalty club management provides Member Grading, Awards and Promotions automatically based on pre-defined configurations.
- 5** Without the interface of an electronic management system a number of transactions go un-noticed, example many table game players win or lose substantial sums of money on a single hand. However, these individual outcomes are often not captured.
- 6** Implementing a computerised management system implies central management of all your data and secure distribution as required. Control and security is applied by venue specific needs, procedures and processes.
- 7** Automating a gaming floor means automating paper trails and payouts.
- 8** Deploying ACE Systems into your venue provides automated processes that increases customer satisfaction by not only providing incentivised, trackable gaming BUT as manual processes decrease customer interaction increases.
- 9** Reduces losses/ fraud from Coin Refills and key-on credits . All payouts are accurately tracked and reported on.
- 10** ALL Cash assets and floats are tracked protecting the casino from theft.
